Next Week's Scoop

Serve Others. Grow in Christ. Aspire to Excellence.

No power in the sky above or in the earth below - indeed, nothing in all creation will ever be able to separate us from the love of God that is revealed in Christ Jesus our Lord.

WEEKLY HEALTH TIP

As we come closer to the end of the summer months, it is important to remember the impact that **sunlight** has in our daily lives. We all need exposure to the sun's rays to allow our bodies to naturally produce vitamin D. This important vitamin helps with the absorption of calcium for healthy and durable bones. If we are exposed to an excessive amount of **sunlight**, there can be some harmful effects to our health. The ultra violet (UV) rays of the sun can have a particularly damaging impact to our skin, eyes and immune system. Taking the necessary precautions to guard from these harmful effects is very important. Wearing sunscreen when spending long amounts of time outdoors can prevent our skin from burning. Sunscreens with an SPF of 30 are recommended to help fully protect us. Remember to enjoy the incredible **sunlight** while we have it, and take the necessary steps to prevent damage from the sun.
